Risk Factors and Forward-Looking Information

This news release may include statements about expected future events and/or financial results that are forward-looking in nature and subject to risks and uncertainties. The issuer cautions that actual performance will be affected by a number of factors, many of which are beyond the control of the Liquidator.

Certain risks include, but are not limited to: the Fund cannot assure its shareholders of the timing or amount of any liquidation distributions. The timing of liquidation of the Fund's portfolio assets depends on the timing of occurrence of liquidity events in the underlying portfolio companies and the amount of such distributions depends on the proceeds realized from such dispositions which in turn will depend on the many factors that impact the value of the portfolio companies. The Fund will continue to incur expenses that will reduce the value of any liquidation distributions; if the Fund fails to retain sufficient funds to pay the expenses and liabilities actually owed to the Fund's creditors, each shareholder receiving liquidation distributions could be held liable for payment to the Fund's creditors, of his, her or its pro rata share of any shortfall, up to the amount actually distributed to each shareholder; if, at the time of a distribution to shareholders, the Fund cannot pass statutory solvency tests, the distribution may be prohibited; there are no assurances that the Liquidator will achieve the same financial results that management might achieve if it had continued as the manager of the Fund; the tax treatment of liquidation distributions may vary from shareholder to shareholder, and shareholders should consult their own tax advisors; and the Class A Shares may, in certain circumstances, cease to be "qualified investments" for "registered plans" for the purposes of the *Income Tax Act* (Canada).
